5.1 INTRO.	6 OF 18	3.0	<p>DELETE : STEP 3. Which states : Distilled water is defined as any commercially available distilled water. A record of the distilled water supplier and the lot numbers supplied will be maintained. A sample from the initial batch of each lot number will be analyzed for volatile organics, inorganics (major anions), metals, and total dissolved solids.</p>

Justification (Reason for Change - Provide Numbers To Reference Corresponding Items Above)

Sampling of distilled water is not necessary at this time because rinsate samples will cover this analysis.
